

Holiday Splendor

Setting up your 11-Foot Flowering Tree Frame

Thank you for ordering a Flowering Tree Frame Display from Primescape Products. This unit comes complete with enough pot rings and water-tight plant holders to fill the frame. If you have any questions during your installation of the frame, please feel free to call us toll-free, 8:00 am to 4:30 pm (cst) and we would be happy to assist you.

PARTS for FT-11 Full

- 1 - Base Platform
 - 3 - Upright posts
 - 1 - Top Platform Section
 - 1 - Bag of (6) nuts, (9) pins & (6) 3/8" hex bolts
 - 50 - Pot Holding Clips (for half-rings)
 - 96 - Angled Pot Ring Holders (total)
 - 97 - Liners (WPH-7 black pots) (total)
 - 3 - Metal half-rings
- 1 FT-7 Half Frame (boxed separately)**

DECORATING TIPS

- Use single stem, double-pinched plant material 15"-18" high.
- You may need to bend rings downward to show more crown of the plant.
- Use Oasis Disks or AquaFür as an aid for watering plants.
- Keep and store shipping carton for convenient storage of the flowering tree frame.

The Primescape Products 11' Flowering Half Tree Frame Display comes complete in **two boxes**. The required tools to assemble the display are a large, rubber mallet and a 9/16" deep-socket wrench. It is recommended to have a number of these tools available. The suggested number of personnel to assemble the tree frame is four. It is strongly recommended to lay out all the component pieces to match like items before assembly.

1. BASE SECTION ASSEMBLY

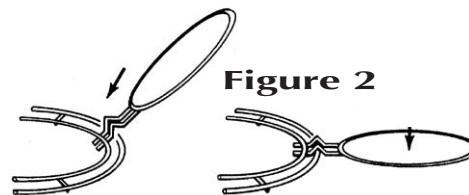

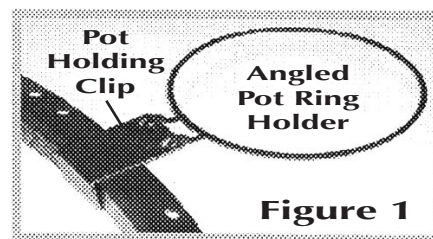

- Locate the tree base platform.
- Insert the three (3) upright legs into the base sockets. Place pins in holes to secure.
- Locate the top platform and slide down over the top of the four (3) upright posts.
- Tighten all bolts in base platform.

2. TIER ASSEMBLY

- Locate the half-rings and lay on flat surface.
- Lift the largest tier first, set over base assembly, and set it (flat side up) onto the lowest available strut welded to each leg.
- Follow step 2 for remaining tiers.

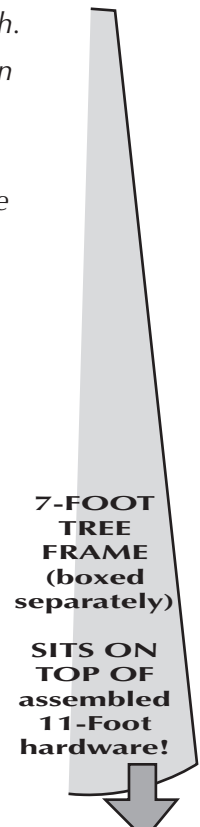

3. RINGS & WATERTIGHT LINERS

- Placement of rings, pots and plants should begin from bottom and work up. To attach angled pot ring holders to the half ring sets, use a pot holding clip (fig 1). To attach them to the tree base and the top platform, fit the ring so that the curved portion of the prong fits snugly OVER the wire frame of the tier (fig 2). Make adjustments laterally on each tier.
- Pot rings may be bent to allow for more crown of plant to show

4. TOP SECTION

1. The top section **IS** the entire FT-7 Half Tree Frame! The base section of the FT-7 slides over the existing posts, and attaches to the top platform with the remaining pins.
2. Refer to assembly instructions for the 5' and 7' Half Tree Frames.

These posts slide into the base of 7-foot tree
