

POLYTRAYS

EASY-TO-USE SHELF for TOP-DRESSINGS

POLYTRAYS are the new, adjustable top-dressing support trays, made from 100% recycled plastic. Designed to hold top dressings like moss and poly-pebbles, POLYTRAYS are adjustable in both inside and outside dimensions. This allows them to fit various sizes of pots, as well as accommodate many plants with different widths.

Snap off unwanted rings to achieve the perfect fit, then place around plant so that it rests on the top surface of the grow pot. Arrange dressing on the exposed surface of your POLYTRAY, and enjoy!

Ultra-sturdy and easy-to-install, POLYTRAYS promote air circulation and protect the soil from any contact with your top dressing.

PART NUMBERS:

POLY-TRAY-CR-SM

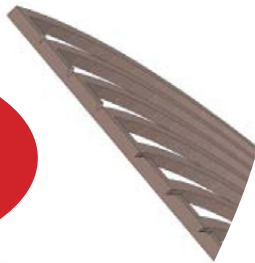

Accommodates circular pots from 7.5" to 12" in diameter

POLY-TRAY-CR-LG

Accommodates circular pots from 12" to 20" in diameter

POLYTRAYS are
**MORE COST
EFFECTIVE**
than other spacers!

EASY INSTALLATION:

Size the POLYTRAY by overlapping the ends and tightly fit tray around top of grow-pot. **It may experience slight upward-bowing, but this helps ensure a tight fit.** If necessary, snap off and remove outer ring(s) to fit. Ideally, the outermost ring presses firmly against the container wall.

1. Place the plant into the decorative container.
2. Bend the POLYTRAY open, and place it around the base of the plant.
3. Let the POLYTRAY rest on the top of the growpot.
4. Add your choice of top dressing such as PolyPebbles, or moss.
