

Primescape Products Quality Plant Cleaner & Shine is a unique blend of natural ingredients that will provide the results you need. You can mix the product at different ratios, creating the level of shine that you want. When it comes to cleaning plants, results count. This is precisely why this is the right product for the job.

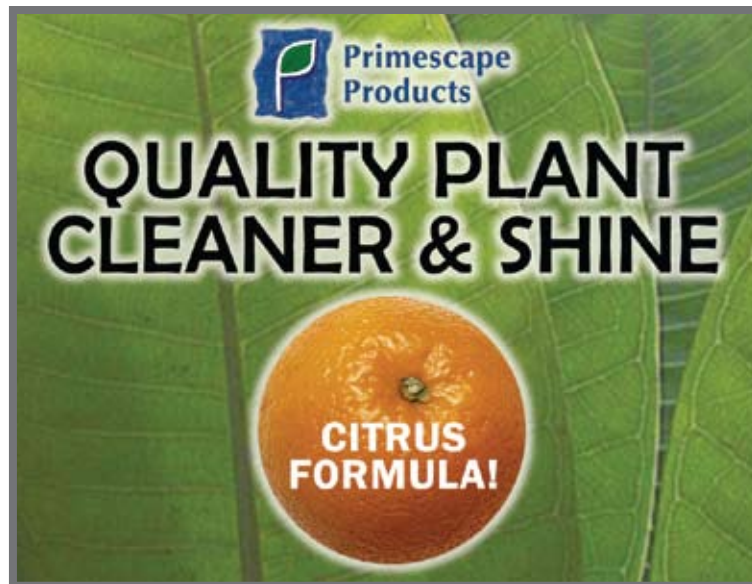

DIRECTIONS: Start by using a drop cloth to protect surrounding surfaces from overspray and drips. Mix 1-5 oz. per gallon of high-quality water. Apply to plant with sprayer until cleaner runs off. Repeat or adjust mix for desired shine. Avoid spraying porous materials and fabrics. Removes and repels dust, dirt and deposits.

FIRST AID: EYES - wash with water for 15 minutes. Call physician. INGESTION - Drink 1-2 glasses of water. Call physician.

Buyer assumes responsibility for use and safety not in accordance with directions.
